"Our effectiveness as an organization is rooted in the involvement, input and investment of our member investors."

THE WORLD IS WATCHING

300 Members — 1 Region

At the Center for Economic Growth (CEG) we believe that the success of the region is not tied to the ideas of a few—its success can only come from active collaboration and participation of many talented minds. As a membership organization, CEG offers the benefits of networking, access to industry-specific networks and the opportunity to be involved on boards and committees to help set and support a regional agenda. Our effectiveness as an organization is rooted in the involvement, input and investment of our members—whether in attracting and driving new investment such as GLOBALFOUNDRIES or developing key workforce and development initiatives with regional partners. The true benefit is seeing the big picture, but through a personal lens: CEG membership is an investment in the success of the region and in your business.

SHOWING THE WORLD HOW IT'S DONE

Our region is no stranger to innovation—from the ages of the industrial revolution to the formation of an internationally known technology hub, CEG has a proven track record of weaving together regional assets and interests into a unified economic development blueprint to grow existing companies, attract new jobs and investment and prepare the region for growth.

Join with like-minded individuals who see great things happening for our region. It is an exciting time to invest in the region through membership with CEG. Indeed, the world is watching.

Let's show them how it's done.
