

»»» Technology-Driven Market Intelligence

TDMI is a market research process designed specifically for technology-based assets.

TDMI helps you understand:

- whether investing resources in a product idea or market diversification opportunity is worthwhile
- which markets and applications are most promising
- what steps to take to exploit market opportunities

TDMI explores your idea, product, or capability, and determines:

- strengths and weaknesses
- potential applications
- trends and drivers that define the opportunity
- potential partners and customers, and potential competitors
- value and size of potential markets
- potential risks

When should I consider TDMI?

		Market	
		Existing	New
Asset	New	✓	✓
	Existing		✓

“We have a great new product idea but we need technology to enable a critical feature.”

CORE VALUE TO YOUR BUSINESS:

- »»» **Specific** - highly focused on your needs
- »»» **Systemic** - proven process and methods
- »»» **Comprehensive** - broad perspective and thorough

Conducted by experienced technical and business experts with broad market knowledge and access to experts in many industries and technical disciplines
