PROFESSIONAL DEVELOPMENT

SAFER, FASTER, MORE EFFICIENT MANUFACTURING WITH SMART MANUFACTURING

Manufacturing is quickly evolving and now requires new knowledge and skills. Technologies such as digital security, robotics, IIOT solutions, and 5G networks and infrastructure are changing the industry and the way manufacturers work, creating demand for workers who are skilled in these advanced technologies. Forward-thinking manufacturers are investing in training programs to build the Industry 4.0 capabilities needed to remain competitive.

FLEXIBLE AND CONVENIENT

Online classes are self-paced, typically taking 60 minutes to complete. They are easily and conveniently accessible on desktops and laptops, and on tablets and phones with the Tooling U-SME app.

EFFECTIVE COMBINATION OF CLASSES

This Smart Manufacturing training program offers a comprehensive overview of the competencies needed to take advantage of the smart manufacturing technologies that are driving the industry forward. This series includes the following classes:

**ADDITIVE MANUFACTURING**
- Introduction to Additive Manufacturing
- Additive Manufacturing Processes
- The Basic Additive Manufacturing Process
- Additive Manufacturing Methods and Materials
- Introduction to Hybrid Manufacturing
- Rapid Prototyping
- Additive Manufacturing: Prototype to Production
- Design for Additive Manufacturing
- Additive Manufacturing Materials Science
- Integrating Additive Manufacturing with Traditional Manufacturing
- Additive Manufacturing as a Secondary Process

**INDUSTRIAL INTERNET OF THINGS**
- Cybersecurity for Manufacturing Basics
- Cybersecurity for Manufacturing: Malware Overview
- Introduction to the Industrial Internet of Things

**ROBOTICS**
- Nondestructive Testing for Additive Manufacturing
- The Additive Manufacturing Supply Chain
- Managing the Additive Manufacturing Supply Chain
- Hybrid Manufacturing with Directed Energy Deposition
- Design for Fused Deposition Modeling
- Design for Directed Energy Deposition
- Design for Binder Jetting
- INDUSTRIAL INTERNET OF THINGS
- Cybersecurity for Manufacturing Basics
- Cybersecurity for Manufacturing: Malware Overview
- Introduction to the Industrial Internet of Things
- Data Collection Fundamentals
- Automatic Identification Technology
- Cybersecurity for Manufacturing: Hacking Overview
- Cybersecurity for Manufacturing: Wireless Networks
- Introduction to Digital Networks
- Data Collection: Inventory and Maintenance
- Introduction to Digital Twin
- Application for Robots
- Automated Systems and Control
- Robot Axes
- Robot Maintenance
- Introduction to Robotics
- Robot Safety
- Robotic Drives, Hardware, and Components
- End Effectors
- Robot Installations
- Robotic Control Systems
- Industrial Network Integration
- Introduction to Collaborative Robots
- Robot Sensors
- Vision Systems
- Robot Troubleshooting
- Concepts of Robot Programming

— New content is always being added. Check with your representative for the most current list of classes. —
